

PRANAV DHAWAN

New York City, NY | pranavdhawan99@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

George Washington University, Washington, DC May 2026
Master of Science, Data Science | GPA: 3.74/4.0

Coursework: Machine Learning, Deep Learning, NLP, Data Mining, Cloud Computing, Time Series Analysis

Manipal University Jaipur, Rajasthan, India May 2024
Bachelor of Technology, Computer Science and Engineering | GPA: 8.51/10.0

EXPERIENCE

American Chemical Society, Washington, DC May 2026 to Present
AI Workplace Engineer Intern

- Designed, developed, and productionized an AI service desk workflow supporting approximately 245 of 350 monthly tickets using Microsoft Copilot, Ivanti, and SharePoint, automating classification, response generation, routing, and follow up handling.
- Built an onboarding and offboarding agent that automates tracking and documentation of hardware assigned to employees throughout the equipment lifecycle.
- Authored an AI governance framework covering data protection, knowledge access, human review, and responsible deployment controls that is under formal consideration for organizational adoption.

Siva Info LLC, New York, NY June 2026 to Present
Independent Contractor, AI

- Redesigned the complete XML tagging and classification pipeline across approximately 3,000 entries, increasing completeness and accuracy from 32% to 99% and reducing processing time by approximately 50%.
- Built document change detection tooling that compares PDF editions and classifies text movement, grammatical edits, deletions, and additions for downstream content workflows.

Lumina Datamatics, Chennai, India February 2024 to August 2024
Machine Learning Engineer

- Owned the end-to-end development and AWS SageMaker deployment of a YOLOv8 document intelligence pipeline processing more than 10,000 documents per day, eliminating manual processing and improving extraction accuracy by 16%.
- Replaced legacy LayoutParser components with a custom computer vision pipeline evaluated using mAP@50 and mAP@50 to 95, reducing inference latency by approximately 0.3 seconds per page.
- Architected and deployed a hybrid RAG system for internal legal document search using Sentence Transformers, FAISS, BERT QA, and BART, reducing retrieval time from minutes to under 5 seconds.
- Redesigned factual extraction around extractive BERT QA after identifying hallucinated structured fields from generative BART outputs, improving grounding for dates, names, and case metadata.

HCL Technologies, Noida, India July 2023 to September 2023
Machine Learning Intern

- Built clustering, Logistic Regression, and Random Forest models across data from more than 500 employees, achieving 87% predictive accuracy and identifying the five strongest drivers of workforce performance.
- Engineered more than 12 behavioral and productivity features using SQL and Python and surfaced model findings through Tableau dashboards.

PROJECTS

Stock Screen | AI Powered Financial Research Platform

- Built and deployed a real time financial research platform used by more than 100 users, combining stock analysis, news, filings, and forecasting workflows while maintaining 100% observed uptime.

Edge Based PII Detection and Censoring

- Developed the best performing transformer model in a comparative benchmark across BERT, RoBERTa, DistilBERT, and DeBERTa, achieving 98.1% F1 and 97.9% recall across 54 PII entity types; exported the model through ONNX for sub 100 ms on device inference.

Multimodal Financial Time Series Forecasting

- Developed the best performing LSTM model in a benchmark of more than 10 architectures across numerical, text, and graph modalities, outperforming the evaluated multimodal approach on the FinMultiTime dataset.

TECHNICAL SKILLS

Languages: Python, SQL, R

Machine Learning: PyTorch, TensorFlow, scikit-learn, Hugging Face, NLP, Computer Vision, Time Series Forecasting, Classification, Clustering

Generative AI: RAG, LangChain, CrewAI, Microsoft Copilot, Sentence Transformers, FAISS, Agentic AI

Deployment and Data: AWS SageMaker, Google Cloud Platform, ONNX, Streamlit, pandas, NumPy, MySQL

Visualization: Tableau, Power BI, Matplotlib
