

Pranav Dhawan

Washington, DC | dhawanpranav02@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

George Washington University	Washington DC, USA
<i>Master of Science, Data Science (GPA 3.74)</i>	May 2026
Relevant Coursework: <i>Machine Learning, Deep Learning, NLP, Data Mining, Cloud Computing, Time Series Analysis</i>	
Manipal University Jaipur	Rajasthan, India
<i>Bachelor of Technology, Computer Science and Engineering (GPA 3.52)</i>	May 2024
Relevant Coursework: <i>Algorithms & Data Structures, Database Management Systems</i>	

PROFESSIONAL EXPERIENCE

American Chemical Society, Washington, DC, USA	
<i>AI Workplace Engineer</i>	May 2026 – Present
- Building agentic AI workflows to automate service desk and ticketing operations across the full lifecycle. - Designing scalable AI workplace solutions using workflow orchestration, knowledge retrieval, and human-in-the-loop automation.	
Lumina Datamatics, Norwell, MA	
<i>Machine Learning Engineer</i>	Feb 2024 – Aug 2024
- Developed and fine-tuned computer vision pipelines to detect and extract complex equations from 10,000+ unstructured documents, improving technical content digitization and reducing manual review effort. - Refactored the document layout parsing architecture by replacing legacy LayoutParser components with a custom pipeline, improving extraction accuracy by 16% and reducing inference latency by 0.3ms per page. - Architected a Retrieval-Augmented Generation system for legal document search using optimized embeddings and FAISS indexing, reducing query retrieval time from minutes to under 5 seconds.	
HCL Technologies, Noida, India	
<i>Machine Learning Intern</i>	Jul 2023 – Sep 2023
- Applied clustering and predictive modeling (Logistic Regression, Random Forest) to surface high performance employee segments and pinpoint the key drivers of productivity across a 500+ person workforce. - Engineered 12+ data-driven KPIs from raw activity logs, including screen time, application usage, and behavioral activity patterns, using SQL and Python. - Designed interactive Tableau dashboards to visualize productivity trends, enabling management teams to make data-backed workforce planning decisions.	
Ernst & Young, Gurgaon, India	
<i>Summer Intern</i>	May 2023 – Jul 2023
- Developed Power BI dashboards for Sales and HR functions, visualizing revenue trends, customer acquisition, headcount, attrition, and compensation benchmarks. - Automated ETL workflows using Alteryx to extract, clean, and transform data from 5+ sources, improving reporting consistency and eliminating manual data handling errors.	

PROJECTS AND OTHER EXPERIENCE

Independent Contractor – AI at Siva Info LLC, New York	June 2026 – Present
Working on document workflows and computer vision pipelines for AI-driven document processing.	
Stock Screen	Jan 2026 – Present
A real-time AI-powered terminal that unifies stock analysis, market news, company filings, forecasting workflows, and market context into a single interface.	
Multimodal Techniques for Financial Time Series Forecasting	Jan – May 2026
Conducted a benchmark study on the FinMultiTime dataset using multiple data modalities, evaluating 10+ different finetuned model architectures and ensembles delivered findings in a research paper and technical report.	

PROFESSIONAL SKILLS

Languages, Libraries & Frameworks: Python, R, pandas, NumPy, scikit-learn, Matplotlib, Seaborn, PyTorch, TensorFlow, Hugging Face, n8n, CrewAI, LangChain, Agentic AI

Data & Visualization: SQL, MySQL, AWS, Google Cloud Platform, Power BI, Tableau, Streamlit
