EDUCATION

George Washington University	Washington DC, USA
<i>Master of Science, Data Science (GPA 3.74)</i>	May 2026
Relevant Coursework: <i>Machine Learning, Deep Learning, NLP, Data Mining, Cloud Computing, Time Series Analysis</i>	
Manipal University Jaipur	Rajasthan, India
<i>Bachelor of Technology, Computer Science and Engineering (GPA 3.52)</i>	May 2024
Relevant Coursework: <i>Algorithms & Data Structures, Database Management Systems</i>	

PROFESSIONAL EXPERIENCE

American Chemical Society, Washington, DC, USA	
<i>AI Workplace Engineer</i>	Present
Building AI agents and workflows to automate service desk and ticketing processes end-to-end, from ticket creation to fulfillment, streamlining internal operations.	
Lumina Datamatics	
<i>Machine Learning Engineer</i>	Feb 2024 – Aug 2024
- Fine-tuned Computer Vision models to detect and extract complex equations from 10,000+ unstructured documents, achieving high precision in technical expression recognition and eliminating the need for manual post-processing. - Reduced manual correction overhead by 16% and cut inference latency by 0.3ms per page by replacing LayoutParser with a custom YOLO-based document layout pipeline. - Reduced legal document search query time from minutes to under 5 seconds by architecting a hybrid RAG system with optimized vector embeddings and FAISS indexing, improving search relevance for counsel teams.	
HCL Technologies, Noida, India	
<i>Machine Learning Intern</i>	Jul 2023 – Sep 2023
- Identified the top 5 drivers of workforce performance with 87% prediction accuracy by building models trained on activity data from 500+ employees, enabling targeted HR interventions. - Engineered 12+ data-driven KPIs from raw employee activity logs (screen time, app usage) using SQL and Python, surfacing patterns that differentiated high performance clusters from the broader population. - Designed interactive Tableau dashboards to visualize productivity trends, enabling management to make data-driven workforce planning decisions.	
Ernst & Young, Gurgaon, India	
<i>Summer Intern</i>	May 2023 – Jul 2023
- Consolidated Sales & HR KPI reporting into 4 Power BI dashboards—covering revenue trends and attrition rates—cutting cross-functional reporting turnaround and supporting strategic planning for senior leadership. - Achieved 100% reporting accuracy across monthly business reviews by automating ETL workflows for 5+ data sources using Alteryx, eliminating manual data cleaning and transformation.	

PROJECT EXPERIENCE

Multimodal Techniques for Financial Time Series Forecasting	Jan – May 2026
Conducted a benchmark study on the FinMultiTime dataset using time-series and text modalities, evaluating 10+ standalone, multimodal, and ensemble models; achieved strong predictive performance, with LSTM delivering highly competitive standalone results, and submitted the findings in a research paper and technical report.	
Edge-Based PII Detection & Censoring System	Sep – Dec 2025
Achieved 98.1% F1-score and 97.9% recall across 54 PII entity types by benchmarking four transformer architectures, selecting DeBERTa as the production model, deploying it via ONNX for sub-100ms on-device inference, and building a Streamlit demo with Tesseract OCR, model training, and SHAP/LIME explainability.	

PROFESSIONAL SKILLS

Languages, Libraries & Frameworks: Python, R, pandas, NumPy, scikit-learn, Matplotlib, Seaborn, PyTorch, TensorFlow, Hugging Face, n8n, CrewAI, LangChain, Agentic AI
Data & Visualization: SQL, MySQL, AWS, Google Cloud Platform, Power BI, Tableau, Streamlit
