

Pranav Dhawan

Washington, DC | dhawanpranav02@gmail.com | linkedin.com/in/pranavvdhawann | github.com/pranavdhawann

Graduate student pursuing MS in Data Science at GWU with expertise in machine learning deployment, natural language processing, and data visualization. Proficient in Python, SQL, and AWS cloud services, delivering measurable improvements in model performance and scalable ML solutions.

EDUCATION

MS Data Science | George Washington University August 2024 – Present

GPA: 3.83 /4.0 (Present)

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Visualization, Statistical Modelling, Big Data Analytics

BTech Computer Science Engineering | Manipal University Jaipur November 2020 – July 2024

GPA: 8.51/10.0

Relevant Coursework: Algorithms & Data Structures, Database Management Systems, Cloud Computing, Artificial Intelligence, Computer Networks

PROFESSIONAL EXPERIENCE

Lumina Datamatics | Norwell, MA (Remote) February 2024 - August 2024

Machine Learning Engineer

- Developed solution for layout detection and extraction using object detection frameworks like YOLO, RCNN etc. leading to 20% improvement in accuracy metric compared to existing methods.
- Deployed a cloud microservice for detection and extraction of equations from documents.
- Developed NLP based QA system for legal documents, enabling real-time document search and contextual query responses.

HCL Technologies | Noida, India

July 2023 - September 2023

Machine Learning Intern

- Worked on development of Nippon (HCL's AI-powered workforce tracking SaaS), contributing to features for effort/output correlation and real-time activity tracking.
- Applied ML algorithms and data analysis on employee data to derive new KPIs that informed workforce management decisions.

Ernst & Young | Gurgaon, India

May 2023 - July 2023

Summer Intern

- Developed interactive analytics dashboards for Sales & HR functions using PowerBI and Alteryx, tracking KPIs such as revenue growth, retention, and workforce performance.

TECHNICAL SKILLS & CERTIFICATIONS

Programming Languages: Python, R, SQL, MongoDB

Machine Learning & AI: Hugging Face LLMs, Natural Language Processing (NLP), Deep Learning (CNNs, RNNs, Transformers), Statistical Modelling, Predictive Analytics, Recommender Systems

Data Engineering & Cloud: AWS (S3, EC2, SageMaker), MLflow, Docker, Kubernetes, ETL Pipelines

Data Visualization & BI: PowerBI, Tableau, Matplotlib, Seaborn

Version Control & DevOps: Git/GitHub, MLOps practices

Certifications: AWS Certified Cloud Practitioner (July 2024) | Machine Learning A-Z (Udemy) (July 2023) | PCAP (Python) & CCNAv7 (Cisco) (November 2022) | SQL (Oracle Academy) (April 2022) | RH124-7 & RH134-7 (Red Hat Linux Administration) (April 2022)

RESEARCH PROJECT EXPERIENCE

PDFInsightBot | Python

Developed a PDF chatbot using Mistral LLM and RAG architecture, enabling users to query document content conversationally. Implemented vector-based document retrieval with LangChain and Streamlit UI for real-time PDF analysis and contextual Q&A capabilities.

AutoReel using Reddit API, Microsoft TTS and FFMPEG | Python

Built an automated video generation system that fetches Reddit posts and creates engaging content videos with TTS narration and subtitles. Integrated Reddit API, speech synthesis, video processing, and subtitle generation to produce fully synchronized multimedia content.
